Key reporting metrics

Key metrics	Value/Amount
No of pending NCRs	35
Damages amount recommended on Concessionaire (Rs Cr)	Rs 5.9 Cr
No of pending Change of Scope proposals	2
No of pending disputes	2
Monthly toll collection (Rs Cr) (<i>If applicable</i>)	Rs 3.8 Cr

Key maintenance activities undertaken.

Asset	Maintenance activities undertaken
Pavement	Concessionaire has commenced the work for renewal and repair of pavement on the project highway w.e.f 14th September 2016
Shoulder	
Drainage	Cleaning of drainage in buildup areas in progress
Median	
Road furniture	Concessionaire has taken up repairs and maintenance of MBCB and electric poles, etc. on issuance of NCPs from Independent
Bridges	
Buildings	As per provisions of CA and policy decided by MoRTH/NHAI, 2 ETC lanes at each toll plaza have been operationalised w.e.f. 25th September 2016. The connectivity of ETC lanes with Central Clearing House (CCH) has been achieved and presently ETC lanes are operationalized in Hybrid Mode due to a smaller number of tags
Horticulture	Planting of new trees from Chainage 200+300 to 226+650 Trimming of plants which were causing obstruction to highway users

Pending issues

- Overlay on the entire stretch of project length of 252 km and service roads has not been taken up by Concessionaire yet since the date of completion of overlay is due in next 25 days
- Overall progress is very slow regarding repair of potholes and rutting on Main Carriageway which is causing inconvenience to highway users and is also a concern from road safety point of view.
- Street lighting in

- o **Anantapur bypass** completed on main carriageway and is energized but for service roads street lighting is pending on both sides
- o **Kurnool bypass** erection of poles only completed in main carriageway not yet energized till to date, but for service roads not started

Recommended actions by Supervision Consultant

- In spite of the repeated requests, there is no material change in status of works pertaining to repairs/ rectifications of defects on the project highway. IE has recommended the damages of Rs 5.9 Cr on the Concessionaire on account of delay in repairs of defects in road and bridge works in terms of the provision of Clause 15.8.1 of the Concession Agreement. Concessionaire shall be liable for imposition of further damages on similar lines till the date of completion.
- Concessionaire is requested to take at most care for completing the overlay before 31.03.2017 since the existing road condition is getting deteriorated day by day causing much inconvenience to the traffic.

Annexure IV- Month of survey for equipment-based road condition assessment

Equipment based road inspection shall be done by the Consultant twice a year as per the month of the year defined in the following table.

However, since the first survey shall be conducted within 30 days of appointment of the Supervision Consultant, the following modification to the schedule shall be adopted. For example, if majority of highway length (>50%) passes through a state, where defined survey months are May and November, if appointed date is on 1st March, then the first equipment-based survey shall be conducted in the month of March within 30 days of appointment, and this shall be considered as the equipment-based survey to be conducted in the month of May. The 2nd equipment-based survey shall be conducted in the month of November, the 3rd survey shall be conducted in the month of May and so on. As regards FWD, the first test/survey shall be conducted in the month of March within 30 days of appointment. The 2nd test/survey shall be conducted in March of next year and so on.

FWD ATTRIBUTES - ANNUALLY, BALANCE PARAMETERS -BIANNUALLY)**

In addition to the reports being submitted on equipment-based inspection as specified in Section

4.2 of the Monthly Progress Report in the O&M phases, the Supervision Consultant (IE) shall submit electronically in excel (.xls) format certain key parameters to the Project Director in the following format.

Worksheets under Section 1 ('Road inventory data') shall be updated from surveys conducted only once within 30 days of appointed date of the Supervision Consultant. Worksheets under Section 2 ('Road condition data') shall be updated from surveys conducted annually for FWD attributes and biannually for the remaining attributes.

The fields to be updated in each of the worksheets are described below. Each description is followed by an example of data for a sample project.

SECTION 1 - ROAD INVENTORY DATA

Road inventory data consists of parameters which provide basic information about roads such as pavement type, number of lanes, topography, etc. These parameters are largely static in nature, and therefore a survey to update this dataset shall be conducted only once within 30 days of appointed date of the Supervision Consultant. The road inventory data shall be used to update specific worksheets listed below.

SECTION 2 - ROAD CONDITION DATA

Road condition data consists of parameters which directly affect maintenance requirements of the road. These parameters are dynamic in nature, and therefore a survey to update this dataset shall be conducted annually for FWD testing and every six months as per Annexure IV for network survey vehicle testing. The first survey shall be conducted within 30 days of appointment of the Supervision Consultant and the remaining surveys shall be conducted as per the defined frequency.

As an example, if majority of highway length (>50%) passes through a state, where defined survey months are May and November, if appointed date is on 1st March, then the first network survey shall be conducted in the month of March within 30 days of appointment, and this shall be considered as the network survey to be conducted in the month of May. The 2nd survey shall be conducted in the month of November, the 3rd survey shall be conducted in the month of May and so on. As regards FWD, the first test/survey shall be conducted in the month of March within 30 days of appointment. The 2nd test/survey shall be conducted in March of next year and so on.

The road condition data shall be used to update specific worksheets, which are listed below.
